Daily Maintenance

Go to winScp

On left pane - Navigate to C:\CRIME-WATCH-AMERICA\
IG-QUEUE

click on instagram-atlanta

On right pane - Navigate to instagram-atlanta

- Note both left & right pane should point to the same folder
eg. instagram-atlanta | instagram-atlanta

On right side you should see videos folder & a list of files
go to videos folder and review contents based on date.
if no videos nothing to do

if videos exist based on date

select video to post to instagram and ^{drag/} copy it to left pane.
before posting to instagram make sure sound is "ON" i.e. play it
will also need to create a caption for the video
go to instagram and create post using selected video

Ⓢ There should be a matching caption file in the previous folder < navigate up

you can drag/drop caption file from right panel to the left panel
After posting video you can delete video and caption file
from both left and right pane

from the right pane instagram-xxx folder
select .jpg and .txt from ig-stories-to-post-later.txt file

1st open instagram-xxx-files-to-post-later.txt
then select files to create post (.jpg & .txt)
move them to the left pane
create instagram post

After posting story to instagram delete .jpg & .txt file
from both left and right pane

Note: if you decide not to post stories from a previous day
just delete the old files & videos and move to the
most current stories you might be interested in posting
